SUMMARY

Environmental Engineering graduate with professional experience in Project Support at PT Bina Lestari Lingkungan Sejahtera as Management Consultant of Air Bersih Jakarta in 2026 until now. Previously as Process Engineer at PT Malaya Artha Nusa (2025). I am specializing in project documentation, document control, environmental engineering, and process design. Experienced in managing project documentation throughout tender, construction, and handover stages, as well as supporting technical teams in document verification and coordination. Skilled in water and wastewater treatment, process design, HSE, ISO management systems, and environmental compliance. Holds General Occupational Health and Safety (AK3U) certification with strong organizational, analytical, communication, and teamwork skills. These experiences have shape me into a person with strong time management, discipline, and adaptability skills.

WORK EXPERIENCE

Project Support at PT. Bina Lestari Lingkungan Sejahtera, East Jakarta **Jun 2026 – Now**

- Monitored and maintained Air Bersih Jakarta (ABJ) project documentation, including verification of original documents and soft-copy availability in the Tigres (Sharing Folder).
- Managed SPAM Jatiluhur Hilir project documentation from the tender stage through the construction phase to the Project Handover (Berita Acara Serah Terima/BAST), including administrative documentation.
- Managed, organized, and maintained and followed up project documents project and archives throughout the project lifecycle, from Pre-Construction Meeting (PCM) to Mutual Check 100 (MC 100) of SPAM Jatiluhur Hilir.
- Collaborated with the TaskForce Team to accelerate document validation and ensure documentation readiness of ABJ for submission to PAM Jaya.
- Coordinated with the data administration and technical teams, including the Project Leader, Project Engineer, and Project Control to collect, update, and follow up on outstanding project documentation.
- Prepared documentation coordination reports between the Management Consultant (MK) team and contractors.

Process Engineer at PT. Malaya Artha Nusa, Tangerang Regency **Jun 2025 – Des 2025**

- Designed tanks, vessels, and reactors based on customer requirements.
- Performed calculations for design pressure and operating pressure of tanks, vessels, and reactors.
- Evaluated agitator systems and implemented improvements in compliance with design and operational standards.
- Developed piping layouts and prepared isometric drawings for piping systems.

Assistant Lecture of Environmental Microbiology Laboratory **2021 - 2023**

- Assisted over 100 students during 3 semesters with 5 main modules.
- Prepared lab materials, reagents, and strerilization processes.
- Guided sampling, analysis, and reporting processes.

Assistant Lecture of Wastewater Drainage and Eco-Drainage Engineering **2022 - 2023**

- Trained students on AutoCAD and ArcGIS.
- Assisted over 100 students in designing relevant wastewater drainage systems.

Assistant Lecture of Drinking Water Supply Engineering **2022 - 2023**

- Mentored 4-5 student groups for 6 months.
- Trained students on EPANET application for water flow analysis.
- Evaluated and graded group design reports.

Assistant Lecture Wastewater Treatment Plant Design **2023**

- Supervised 5-6 student groups in designing wastewater treatment units.
- Assessed students comprehension through group presentations.

Assistant Lecture Drinking Water Treatment Plant Design **2023**

- Mentored 4-5 student groups in selecting and designing drinking water units.
- Evaluated student's the designs from intake to reservoir and distribution systems.

Intern at Nanggalo Fecal Sludge Treatment Plant of Padang City **2022**

Administrative and Environmental Health Staff

- Tested effluent contaminants and evaluated treatment unit compliance.
- Evaluated treatment unit designs from bar screen to maturation pond.
- Drafted SOPs for sludge disposal operations.
- Submitted internship report with operational recommendations.

ORGANIZATIONAL EXPERIENCE

Engineering Research and Development Club, Faculty of Engineering **Oct 2020 - Feb 2022**
Staff of Research and Development Department
- Organized Inventor software training.
- Collected and curated students research papers for national competition.
- Holding an essay competition at Alek Gadang Anak Teknik (AGAT) in 2021

Student Executive Board, Faculty of Engineering **Jan 2021 - Des 2021**
Staff of Strategic Study and Action Department
- Created infographics and written analyses on current issues.
- Conducted public discussions on campus and national issues.

Environmental Engineering Student Association **Jan 2021 - Des 2021**
Staff of Academic Department
- Collected past exam papers to support student preparation.
- Organized study clubs and peer-tutoring sessions.
- Coordinated site visits to Nanggalo Fecal Sludge Treatment Plant of Padang City to observed and evaluated the processes of treatments and created an educational video creation.

EDUCATION

Universitas Andalas – Padang, Indonesia **2019 - 2023**
Environmental Engineering | GPA : 3.56/4.00
- Graduated cumlaude
- Focused on water treatment and environmental microbiology.
- Awarded as Best Practicum Participant in Environmental Chemistry Laboratory in 2020.
- Final project: "Monitoring COD/N-Ammonium Ratio in Artificial Wastewater in Partial Nitrification Anammox (PN/A) System and Struvite Precipitation".

TRAINING AND CERTIFICATION

- Occupational Health and Safety Expert (Ahli K3 Umum) – Ministry of Manpower of Indonesia (Kemnaker), [2025]
- Environmental Risk Identification and Assessment – PT Garuda Systrain Interindo, [2025]
- Hazardous Materials Management – PT Garuda Systrain Interindo, [2025]
- ISO 9001:2015 Quality Management System – PT Garuda Systrain Interindo, [2025]
- ISO 14001:2015 Environmental Management System – PT Garuda Systrain Interindo, [2025]
- Basic Fire Fighting Training – PT Garuda Systrain Interindo, [2025]
- Basic First Aid Training – PT Garuda Systrain Interindo, [2025]
- Emergency Response Plan Training – PT Garuda Systrain Interindo, [2025]
- Waste Management – PT Garuda Systrain Interindo, [2025]

Full certificates available here: [https://bit.ly/3VqszsC]

OTHER EXPERIENCE

Student Creativity Program – Exact Sciences Research (PKM-RE) **2022 - 2023**
Created a scientific papers:
- "Recovery of Ammonium and Phosphate from Tofu Wastewater as Fertilizer Using Partial Nitrification Anammox and Struvite Precipitation" (2023).
- "Nitrogen Removal Performance Using Anammox Bacteria from Talago Koto Baru in Membrane Bioreactor (MBR)" (2022).

Community Development Program of BEM KM FT UNAND, Bungus Timur **2021**
Event Coordinator
- Planned and implemented village development programs.
- Engaged with villagers for around two weeks.
- Assisted village authorities in submitting road improvement budget proposals.
- Educated the villagers on waste sorting and processing.

Social Service Program of BEM KM FT UNAND, Puti Bungsu Orphanage **2021**
Event Coordinator
- Organized event activities and delegated responsibilities.
- Conducted bonding events including communal iftar.
- Donated foods and basic necessities.

ADDITIONAL INFORMATION

Field of Interest	:	Health and Safety Environmental, Sustainability, Drinking Water and Wastewater Treatment
Hard Skill	:	Laboratory analysis, JSA and HIRAC, ESG & Sustainability Reporting, Audit HSE, CSMS, Permit to Work, Microsoft office, AutoCAD, Arcgis, Canva, EPANET
Soft Skill	:	Leadership, public speaking, communication, teamwork, adaptability, time management
Language	:	Indonesia, English
